

Permission Slip to Sleep on Side/Stomach

Small Savers follows the recommendations of the American Academy of Pediatrics regarding infant sleeping positions. They recommend that infants under the age of 6 months be put to sleep on their backs. We are aware that young infants sometimes roll themselves over in their sleep or are accustomed to sleeping on their sides/stomachs at home.

Understanding the current statistics on SIDS and infants who sleep on their sides or stomachs, I give Small Savers permission to do one or both of the following for my child (8 months or younger) who has begun rolling over in his/her sleep or who sleeps on his/her side or stomach at home. Please check all that apply.

_____	_____	may remain on his/her side should he/she roll while sleeping.	
	Infant Name		

			Parent Signature

			Date

_____	_____	may be put to sleep on his/her side.
